Stewardship

The following centennial proposal is certified as eligible for Centennial Challenge funding consideration in fiscal year 2008. Funding for the Centennial Challenge requires legislation.

Expand and Develop Self-Sustaining Pony Program

Location: North Carolina – Ocracoke Island

Total Cost: \$50,000

Proposal # 131087

Summary: Expand through partnerships, such as the Ocracoke Preservation Society and other community groups, the development and maintenance of the historical landscape and features associated with the Pony Pen program. Hire a temporary animal caretaker to develop a community based voluntary program. This will provide for a self-sustaining program, assuring the ponies are cared for and the facilities associated with these are maintained appropriately. This will also develop a spirit of commitment and dedication by the Ocracoke community for the care and feed of the ponies, maintenance of facilities and assurance of historical preservation of the natural landscape for the historical pony program.
